POST-PROCEDURE ANESTHESIA INSTRUCTIONS

You may eat and/or drink whatever you want after the procedure. You have been given anti-nausea and vomiting medication.

No alcoholic beverages for 24 hours after your procedure.

No driving for 12 hours after your procedure.

No important decision-making for 12 hours after your procedure.

Make sure to take your pain medication with food so you don't get nauseated, and take your pain pills before your pain gets too intense, so it will be more effective in relieving your pain.

For any anesthesia-related questions, please call our CEO, Pam Wilson, CRNA, MA at **918-704-5556**.
